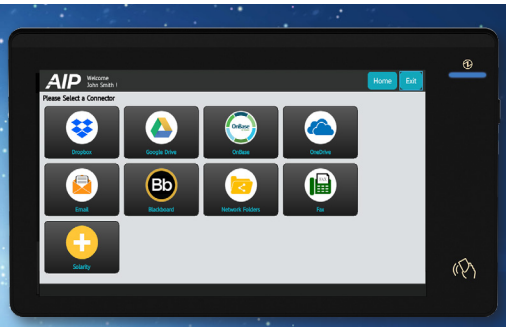
SHARP®

OSA® Sharp Open Systems Architecture

AIP CORE



Simplify and streamline key business workflows with a suite of connectors designed for Sharp Multifunction Printers (MFP) to help organizations provide a secure integrated document scanning and print experience.

Fax Connector

The Fax connector allows users to send scanned documents via a fax gateway with options to include recipient/subject and memo details.

Email Connector

The Email connector provides integrated support for Microsoft® Exchange on premise and webmail services to send documents as secure email messages by users.

Network Folders Connector

The Network Folders connector helps to secure and conveniently scan documents to network share or home folders.

Solarity Connector*

The Solarity connector enables users to scan documents and store files in the Solarity medical record indexing solutions system.

Blackboard Learn Connector*

The enhanced Blackboard connector provides integrated support for Blackboard Learn Classic and Ultra learning and course management system.

Dropbox Connector*

The Dropbox connector enables users to access content from their Dropbox account and print or scan documents directly from Sharp MFPs.

Google Drive Connector*

The Google Drive connector allows users to access content from their Google Drive account and print or scan files directly from Sharp MFPs.

OneDrive Connector*

The OneDrive connector allows users to access content from their OneDrive account and print or scan files directly from Sharp MFPs.

OnBase Connector*

The OnBase connector is seamlessly integrated with OnBase enterprise content management solution to enable users to scan documents directly into OnBase to help streamline industry specific business processes.

Sharepoint Connector*

The SharePoint connector allows users to scan documents to or print from their SharePoint folders directly from Sharp MFPs.

*Additional components and/or licenses for Blackboard, OnBase, OneDrive, Dropbox, Google Drive and Solarity required.

Server Requirements:

- Microsoft Windows 8.1 or later or Windows Server® 2012 or later
- Microsoft Internet Information Services (IIS) 7.5 or later with IIS Manager
- 5GB of space available on the system disk

SHARP

Authorized Integrator

Sharp OSA® Platform

AIP Core is available exclusively through Sharp Authorized Integrator Program (AIP) members. Find AIP dealers near you with the dealer locator on **Sharp USA**

AIP CORE

What is Sharp OSA® Technology?

Sharp OSA technology is a software development platform for Sharp multifunction printers (MFP). Utilizing industry standard web-services and RESTful Web API technologies, Sharp OSA platform enables integrated and customized applications to add agility to your workplace.

Sharp OSA platform is cloud ready, providing ultimate flexibility for a corporation to implement business processes in the cloud or local premises.

SHARP PARTNER PROGRAM

Interested in developing a Sharp OSA application?

Sharp extends Sharp OSA technology through the Sharp Partner Program. More innovative and advanced applications are available from program members. Sharp also encourages corporate customers and independent software vendors to take advantage of Sharp OSA technology. For more information, visit **sharp-partners.com**
